

Part A: Lab Programs

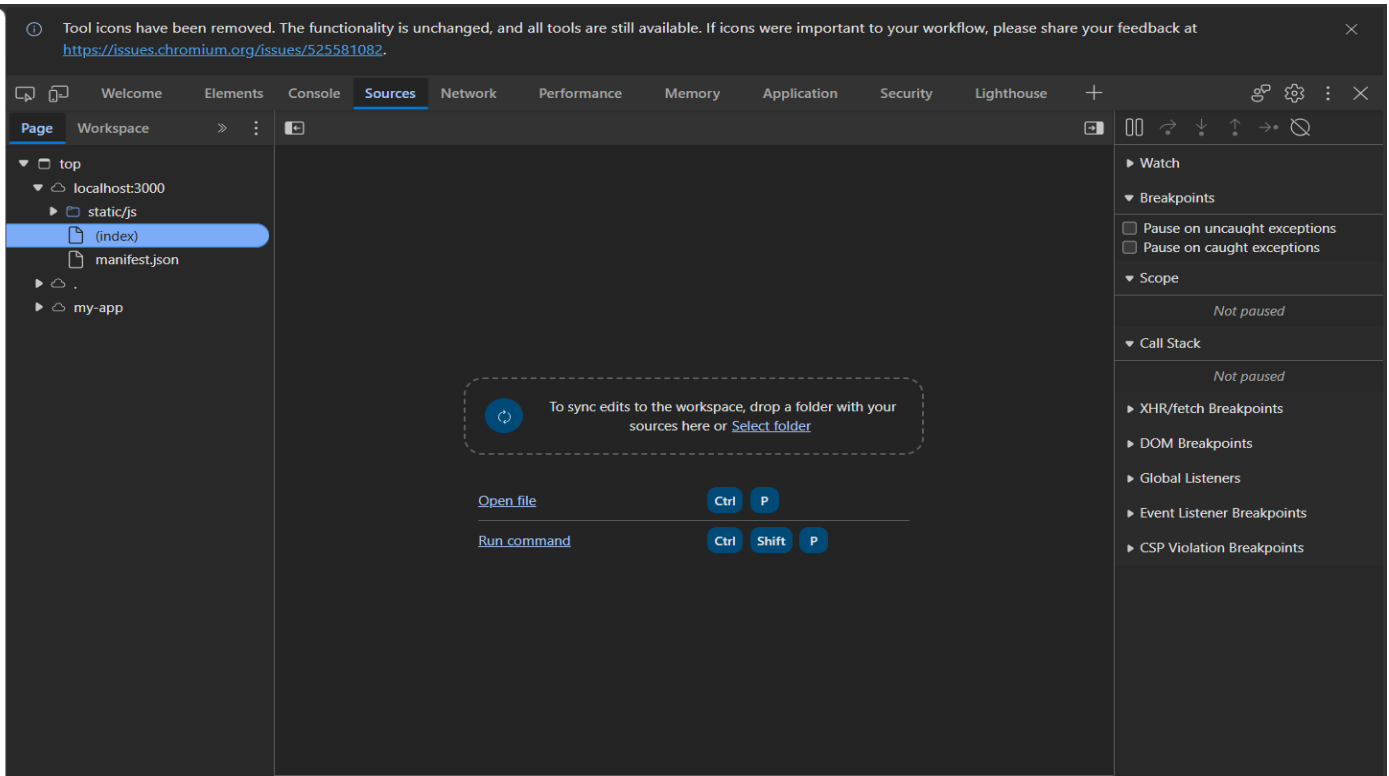

1

Set up and use a modern web development environment and browser-based debugging tools for application development.

App.js code

```
function App() {  
  
  console.log("Application Started Successfully");  
  
  return (  
    <div style={{ textAlign: "center", marginTop: "100px" }}>  
      <h1>Hello</h1>  
      <h2>Welcome to My First React Application</h2>  
      <p>This application is running successfully.</p>  
    </div>  
  );  
}  
  
export default App;
```

Tool icons have been removed. The functionality is unchanged, and all tools are still available. If icons were important to your workflow, please share your feedback at <https://issues.chromium.org/issues/525581082>.
